VERBAL DESCRIPTION

This is an intact broken sherd disk - pierced sherd disk - worked sherd - used sherd.

It is made from a curved

vessel (name the type-variety if possible).

If broken, the estimated amount preserved is: 25%

It is circular - slightly off round - oval - square - rectangular - irregularly shaped (describe).

If circular, the diameter is is not measurable. Diameter = cm; % preserved.

The shape was was not inscribed/incised/cut into the interior - exterior - either surface - can't tell.

The basic method of shaping appears to be breaking - chipping - grinding.

The edge is - is not smooth all over - in some areas.

If smooth, it appears to be so due to deliberate finishing - use wear - both.

The intersection of edge and interior is unused worn in places - worn all over.

The intersection of edge and exterior is unused worn in places - worn all over.

There is - is not a hole drilled in the item.

If not, is there any sign of piercing/drilling?

If yes, the hole is drilled from one side only biconically drilled.

The hole's interior diameter is .35 cm.

The maximum width of the piercing is .5 cm on the interior surface and .5 cm on the exterior.

Burning or sooting: yes no. If yes, describe location and extent:

Firing core is absent central - interiorly shifted - present only in thickest parts.

Not drawn Drawn. The piece is - not slightly - moderately - very - extremely - eroded.

Any other information about use, wear, or anything else:
